

What Should I Already Know?

Solve division problems using practical equipment and jottings to share items and put them in groups, including remainders (left over).

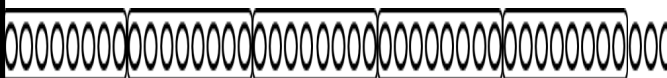

$$12 \div 3 = ?$$

Begin to read this calculation as, 'How many groups of 3 are there in 12?'

What do I need to know?

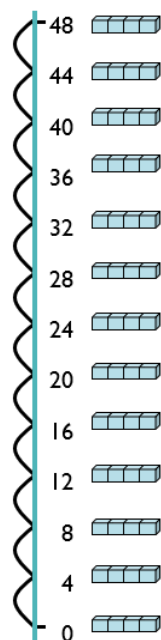

Use division by grouping (including those with remainders).

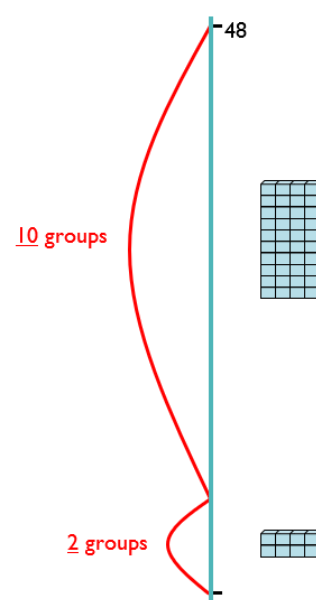

Stage 1 – Repeatedly subtract individual groups of the divisor

Stage 2 – subtracting multiples of the divisor

1.
