

## What Should I Already Know?

Partition the amounts.

$$700 \rightarrow 50 \rightarrow 4$$

Subtract, starting with the ones, then tens, then hundreds.

$$\begin{array}{r} - 200 \rightarrow 80 \rightarrow 6 \\ \hline \end{array}$$

Exchange when needed.

$$\begin{array}{r} \overset{600}{\cancel{7}00} \rightarrow \overset{140}{\cancel{5}0} \rightarrow \overset{1}{4} \\ - 200 \rightarrow 80 \rightarrow 6 \\ \hline 400 \rightarrow 60 \rightarrow 8 = 468 \end{array}$$

## What do I need to know?

Use column subtraction to subtract numbers, including decimals.

Start with the smallest amount when subtracting and exchange if needed.

$$\begin{array}{r} \overset{6}{\cancel{7}0} \overset{6}{\cancel{7}2} \\ - 3226 \\ \hline 3846 \end{array}$$

$$\begin{array}{r} \overset{2}{\cancel{3}} \overset{13}{\cancel{4}2} \\ - 1.76 \\ \hline 1.66 \end{array}$$
